

Project Development Phase

Delivery of Sprint-4

Team ID	PNT2022TMID48383
Project Name	Smart Farmer-IOT Enabled Smart Farming Application

In Sprint-4 we are going to make the user interact with Software.

Step-1: First user need to download the android APK file from MIT app inventor where we developed our mobile application and install in their mobiles.

Step-2: After successful installation we can find app icon in our mobile as shown below.

4G 8:41

VoLTE 60

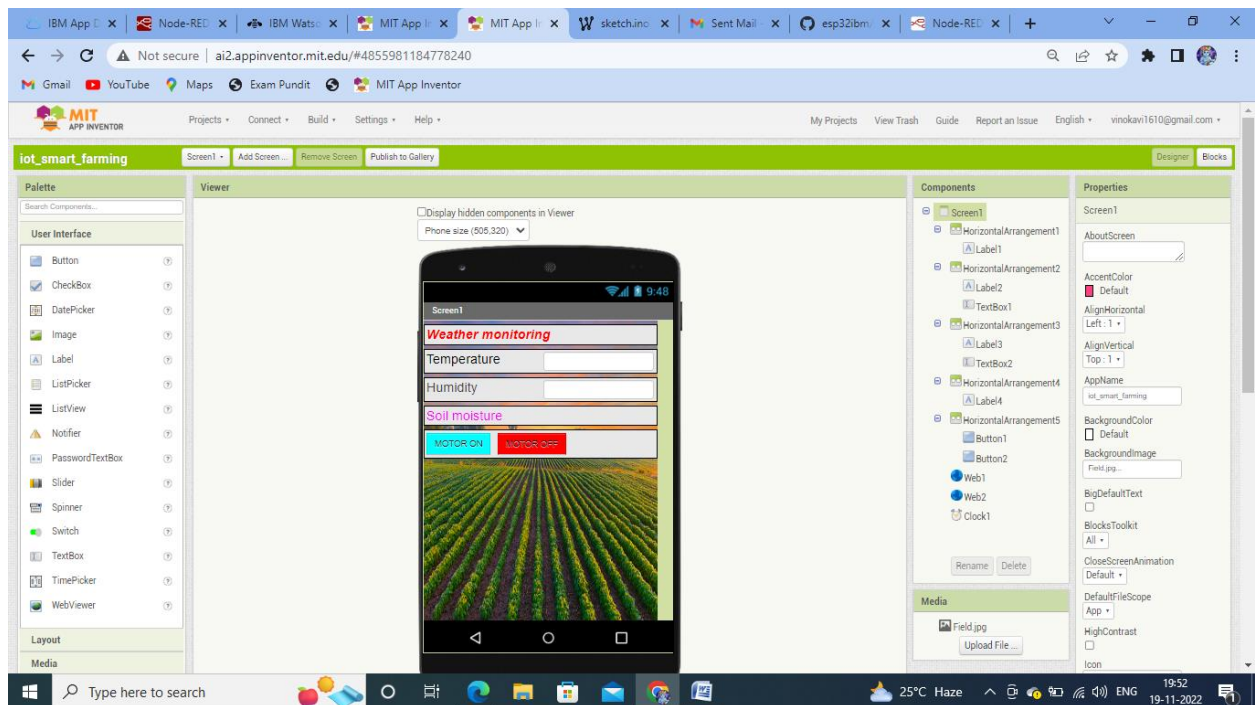

Rocket.Chat

iot_smart...

Step:3 After clicking the app icon the next page will be open. In that page we can see the real time temperature , humidity and soil moisture reading and motor ON and motor OFF control button also as shown below.

Conclusion: we are successfully created the IOT enabled smart farming application.
